

Spectrum® Plasma Cutters Are Getting Even Better

Miller has made some exciting changes to the Spectrum Series of plasma cutters to add more capabilities, easier operation, increased operator comfort, additional cutting options and longer consumables life.

The NEW Spectrum® 375 X-TREME™

- Flexible, quick-connect ground cable with smaller, heavy-duty clamp

The NEW Spectrum® 625 X-TREME™

- Ultra-Quick Connect™ torch cable
- Flexible, quick-connect ground cable with smaller, heavy-duty clamp
- Available with factory-ready long- or short-body machine torches
- Upgrade kit available to convert hand-torch machines for automated cutting

The NEW Spectrum® 875 and 875 Auto-Line™

- New torch cable with increased flexibility
- Factory-optional long-bodied machine torches and new short-bodied machine torches
- New factory-upgrade machine torch options for Spectrum 875
- XT60 torch with improved ergonomic, no-slip grip and improved consumables life cuts up to 50 percent faster

Great New Features Make These Machines Even Better

▶ Quick-connect ground cable

More flexibility means a ground cable that's easier to position. It includes a new heavy-duty clamp that's smaller and easier to handle.

Availability: Spectrum® 375 X-TREME™, Spectrum® 625 X-TREME™

▶ Ultra-Quick Connect™ torch cable

Allows portability and easy interchangeability of hand-held or machine torches, allowing manual or automated cutting.

Availability: Spectrum 625 X-TREME, Spectrum® 875, Spectrum® 875 Auto-Line™

▶ Long- or short-bodied machine-torch availability

Machines may be ordered with either long-body or short-body machine torches to fit any application.

Availability: Spectrum 625 X-TREME, Spectrum 875, Spectrum 875 Auto-Line

▶ Automated cutting options

Newly available upgrade kits and factory automation-ready units. Now available with long- or short-body torches and machine torch options. Includes remote trigger, ok-to-move signal and voltage sensing. Machines can also be used with hand torches.

Availability:

Upgrade kits:

Spectrum 625 X-TREME

Factory automation ready:

Spectrum 625 X-TREME,

Spectrum 875,

Spectrum 875 Auto-Line

▶ XT60 hand torch

Cuts up to 30 percent faster and includes new design features for greater control and reduced operator fatigue: a highly flexible cable, an ergonomic 80° handle, a no-slip grip and a safety trigger guard.

Consumables are interchangeable with the XT60 machine torch (excluding machine shield) and last up to twice as long as the previous torch model.

Availability: Spectrum 875 (25-foot cable)
Spectrum 875 Auto-Line (25- or 50-foot cable)
