**TITAN ABC Portable Fire Extinguishers** use a siliconized Mono Ammonium Phosphate Dry Chemical. This powder smothers Class A fires by coating the surface of the material and melting into a blanket. On Class B fires the Dry Chemical stifles the burning vapour and restricts oxygen flow, reducing flashback. ABC Dry Chemical powder will not conduct electricity back to the user.

CLASSES OF FIRES	TYPES OF FIRES	PICTURE SYMBOL
<b>A</b>	Wood, paper, cloth, trash & other ordinary materials.	
<b>B</b>	Gasoline, oil, paint and other flammable liquids.	
<b>C</b>	May be used on fires involving live electrical equipment without danger to the operator.
