

SIMPLE GREEN CLEAN FINISH™ DISINFECTANT CLEANER

Simple Green Clean Finish Disinfectant Cleaner is a ready-to-use cleaner, disinfectant and deodorizer that kills 99.9% of bacteria in 5 seconds*. The multi-purpose product also fully disinfects hard, non-porous surfaces in as little as 30 seconds, while many competitive ready-to-use brands require users to keep the area wet for as long as 10 minutes.

It quickly and safely kills cold** and flu viruses and is also effective against common household germs such as Salmonella, E. Coli, MRSA, Norovirus, and many more.

Unlike competitors, Simple Green Clean Finish is also effective against Canine Parvovirus and Feline Calcivirus. This bloodborne-pathogen compliant formula also kills HIV-1 and Hepatitis B and C.

It removes dirt, grime, food residue, organic matter and other soils while eliminating odors; leaving surfaces smelling clean and fresh.

The Clean Finish formula is alcohol- and bleach-free, and suitable for a wide variety of daily use applications both in homes and businesses.

HOME

KITCHEN
