Description

EcoActiv offers the industrial user a non-butyl, environmentally preferred cleaning alternative without a compromise in product performance. EcoActiv was created to fulfill the requirements of modern health standards, environmental consciousness and the need for a safe, effective product to clean the toughest industrial contaminants.

Benefits

- Biodegradable
- Non-toxic, non-butyl
- Non-corrosive
- Non-flammable
- Economical
- Safe on aluminum and other soft metals

Applications

EcoActiv cleans metal, plastic and rubber parts in dip, wipe or spray Applications. EcoActiv eliminates the need to compromise between mild, ineffective cleaners and harsh, dangerous solvents. EcoActiv is highly dilutable, can be used indoors or out to remove heavy deposits of grease and oil from virtually any surface, without concern over dangerous concentrations of vapors or complex waste disposal.

EcoActiv is particularly effective in automated cleaning systems in place of caustic cleaners. When used in place of caustic powders or liquids, EcoActiv has a significant added benefit: it is safe on aluminum and other soft metals at recommended use dilutions.

Methods and Dilutions

EcoActiv is highly concentrated and can therefore be diluted depending on the cleaning application and method.

Heavy Oil and Grease	Full Strength
Medium Duty Cleaning	1:2
Light Duty Cleaning	1:10

Key Physical Characteristics

Property	Typical Value
Boiling Point	221° F
Color	Clear, Blue liquid
Flash Point	None
Odor	None
Solubility in Water	Complete
Specific Gravity (H2O=1)	1.03
Vapor Pressure	ND
VOC Content	None
pH	~9.8

Safety and Handling Precautions

Maintain adequate ventilation. Rubber or plastic gloves are recommended. Safety glasses are recommended. Wash hands after use. Keep out of reach of children. Store in a cool dry area. Keep from freezing. See MSDS and Label before use.

Packaging

Product Name	Part No.	Packaging
EcoActiv	32655	55 Gal Drum
EcoActiv	32605	5 Gal Pail
EcoActiv	32601	1 Gallon
